

**Integrated hydro-meteorological observation solutions.
Irma Ylikangas, Business Development Manager, Vaisala Oyj**

Abstract

Vaisala is a provider of highly integrated hydro-meteorological observation solutions ranging from the largest observation solution networks in the world with hundreds of automatic stations and intelligent sensors to single hydrological or meteorological station with standard sensors. The Vaisala approach starts from early involvement in defining the observation requirements, designing the communication strategy as well as planning the implementation and fielding activities together with the users. Bringing Vaisala into the process early enables us to tailor the best possible solution.

Vaisala takes the full responsibility to ensure the highest operational efficiency and lowest operation and maintenance costs in all systems provided.

The Vaisala Group, domicile in Vantaa Finland, has about 1000 employees and net sales of EUR 197,9 million in 2005 with offices and operations in 11 countries. Vaisala Oyj is listed on the Helsinki Exchanges in Finland. Vaisala develops, manufactures and markets meteorological and hydrological instrumentation, systems and integrated hydro-met observation solutions to offer services in support of their customers' day-to-day operations.

Vaisala Group is a comprehensive hydrological and meteorological turn-key solution provider.
